EDUCATION

Dayananda Sagar College of Engineering

B.E. Information Science

Sept. 2027

CGPA: 9.15

SKILLS

Languages: Python, JavaScript, TypeScript, C/C++

Technologies: React, Next.js, TailwindCSS, Vite, React Flow, Node.js, Express, FastAPI, REST APIs

Databases & Infrastructure: PostgreSQL, MongoDB, Redis, Docker, Docker Compose

Tools: Git, GitHub, GitHub Actions, Google Workspace

Project Skills: Project Coordination, Documentation, Team Collaboration, Problem Solving, Stakeholder Communication

EXPERIENCE

FreeSip India

Jan 2025 – May 2025

Full Stack Developer Intern

Onsite

- Contributed to the development and implementation of features for a B2B marketing platform focused on event-based brand engagement initiatives.
- Collaborated on translating project requirements into actionable deliverables while working across design and development workflows.
- Participated in iterative project execution, adapting to evolving requirements and delivering improvements within defined timelines.

PROJECTS

Scopuz | *React, FastAPI, MongoDB, Docker*

[Repo](#) [Demo](#)

- Built an AI-powered SaaS platform for analyzing webpage visibility and optimization across modern AI systems including ChatGPT, Gemini, Claude, and Perplexity.
- Designed and integrated multiple modules including audit systems, monitoring workflows, analytics dashboards, and AI-readiness scoring mechanisms.
- Implemented data-driven reporting and monitoring capabilities to generate actionable insights and support decision-making.

EmberEye: AI-Powered Wildfire Risk Prediction | *Tensorflow, CNN, FastAPI, Python*

[Repo](#) [Demo](#)

- Led development of a risk prediction platform involving data collection, model development, API integration, and dashboard deployment.
- Coordinated machine learning workflows and backend services to support risk analysis and visualization.
- Built systems enabling data-driven decision making through actionable insights and preventive recommendations.

Pharma Trace | *React Flow, FastAPI, PostgreSQL, Redis*

[Repo](#) [Demo](#)

- Developed an AI-powered pharmaceutical supply chain visualization platform for generating and analyzing knowledge graphs.
- Integrated search workflows, caching mechanisms, and structured data pipelines to organize supplier relationships and supply chain insights.
- Built interactive graph visualizations and reporting features to support analysis and informed decision-making.

LEADERSHIP & ACTIVITIES

Team Head – Mudita, DSI

Nov 2023 – Present

- Led community initiatives by coordinating team activities, managing outreach efforts, and supporting project execution through content and social media initiatives.

Technical Team Head – Genesis ISE

Nov 2024 – Present

- Contributed to planning and execution of technical events including Hackman and Catalysis while collaborating with teams to ensure smooth coordination.

Achievements: AGMTA Mathematics Quiz Winner • State-Level Gold in Athletics, Football, and Rope Skipping
